Ship Bells

Kahlenberg Ship's Bells are manufactured of cast bell bronze alloy, developed specifically for superior tonal quality and resonant characteristics.

BE/36260 : 12" Ship's Bell (swing mount)

BE/36491: 12" Ship's Bell (rigid mount)

BE/36265 : 12" Ship's Bell with bracket

Kahlenberg Ship Bells are available in a number of customized options, including the name and/or logo of the vessel cast into the surface of the bell. When cast with custom graphics included, these bells are bespoke, one of a kind items, made with digital text and logos accurately reproduced via lost wax process. Typically cast in bell bronze alloy with chrome plate finish, these bells are also available in stainless steel.

International Maritime Organization (IMO) Regulations, ('72 Colregs), require 12" Ship's Bells for vessels over 20 meters in length.

Kahlenberg Ship Bells are of the highest quality materials, cast and finished in the U.S.A.

BE/36260 "Classic" 12" Ship's Bell

Options include the casting of the vessel name and/or logo, and launch date in the bell. A proof of the placement and design of complicated graphics is supplied to the customer for approval prior to production.

A variety of surface finishes are offered for bronze bells, including a satin or buffed mirror finish, and award winning decorative chrome plating of the highest quality. Stainless Steel bells are also available of this same design.
